

# Reading Window

## Supplies:

Black notebook cover vinyl  
Exacto blade  
Straight edge  
Cutting mat  
Ruler  
White pencil  
Credit card holder  
Colored transparent sheet covers  
Credit card (optional)

## Instructions:

1. Using a credit card as a pattern, trace the outline on a piece of black vinyl using a white pencil. Or you may make a window any size you desire.
2. Cut a horizontal "window" 1/8" wide the length of your window leaving 1/8" on either end. Using an Exacto blade and a straight edge will keep your line straight.

3. Cut a piece of colored transparency the same size of your window.
4. You can use your window by itself or with the colored transparency in the credit card holder.
